

Intiva offers the first decentralized credentialing solution for healthcare professionals. Built on decades of healthcare operations experience, our mission is to aid healthcare professionals through every step of their career. We automate administrative tasks to save the healthcare industry billions while setting the new standard of provider identity, verification, and reputation.

PLATFORM FEATURES

Ready Doc™

Built on Swirld's Hashgraph distributed ledger technology, Ready Doc™ is the first credential management solution to offer instant verification. Easily upload, verify, and share all of your documents and credentials from one place to speed up the granting of privileges. Join the new standard of credential management and get to work faster.

Continuing Medical Education

We partner with the top thought leaders to offer CME/CE, including ACCME accredited, state required, board preparation, and MOC courses. Choose from our listings and sign up for our platform to start tracking and acquiring credits. Once completed, our LMS will automatically store your certifications.

Intiva Careers™

Our simple job search solution lets you upload your CV and easily apply for opportunities with just one click. Benefit from an anonymous application process, with filters that go as far as searching by geolocation, board certification, and desired salary. We currently offer over 9,000+ clinical positions, including locum tenens.

Connect

When it comes to healthcare, communication is key, which is why we offer HIPAA compliant messaging, emailing and document sharing for free. Manage digital PHI correspondence and streamline care team coordination. Our connect feature lets you access and share patient records, submit lab orders, and connect with other providers.

Marketplace

We've created an online marketplace of goods and services, curated for medical professionals, from the market's most affordable cyber insurance, to the most innovative hardware available. Our aim is to offer the best deals possible, for the right price and the simplest way to buy.

iGO HD™

Streaming service for interactive, on-demand content pertaining to CME courses and webinars, training, product, news and promotional material. This service was originally designed for fan websites (e.g. music, sports, etc.) to provide a unique interactive experience and fan and customer engagement.

TIVA™

The Intiva Platform's exclusive ERC-20 cryptocurrency minted July 2018 incentivizes information exchange, engagement, and facilitates frictionless transactions within the Intiva Marketplace.
