

THREE WAYS

Faster Credentialing Can Improve Healthcare in America

It can take anywhere from a few weeks to six months for a physician to get credentialed¹

The average doctor spends

8.7 HOURS

per week on administration²

ONE

Doctors could start work sooner

\$25,000+

in lost income waiting to get credentialed³

Average school debt in 2018⁴

That's **\$2,000+** a month for a **DECADE** with a 5% loan⁵

TWO

The industry could save billions

Fast credentialing saves facilities **\$150,000+**

per physician per month⁷

\$361 BILLION

spent annually on healthcare administration

with half of that being unnecessary⁶

THREE

Patients could receive better care

Equipment

Doctors

Beds

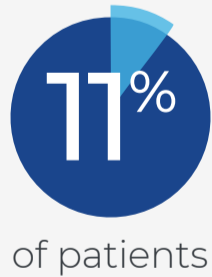

Money saved can be put towards:

Nurses

Facilities

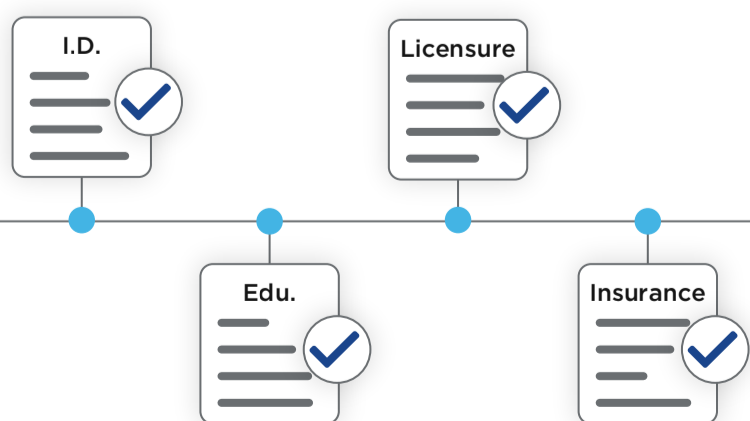

of patients

Feel they have enough time together for quality care⁸

of physicians

Faster credentialing is here

This is a billions-a-year issue that points to a bigger systemic problem that Intiva Health can help fix.
