

Intiva Health offers hundreds of high-quality CME courses online to over 15,000 medical groups and professionals nationwide. With partners such as the American Heart Association and National Osteoporosis Foundation, Intiva Health is one of the fastest-growing CME resources.

Free and accredited

All CMEs Intiva Health offers are ACCME-accredited, with many being AMA PRA Category 1™. A broad range of courses are also accredited by AANP and ANCC, providing the highest level of accreditation for healthcare professionals. On top of that, Intiva Health provides board preparation, state-required courses, and MOCs—80% of which are free.

Imminent Fractures Risk Evaluation

NATIONAL OSTEOPOROSIS FOUNDATION

★★★★☆ \$0.00

The clinical significance of osteoporosis is in the occurrence of fractures and re-fractures. The main risk factor of sustaining a fracture is a previous one, but a recent fracture is a better fracture risk factor
